COFFEE CONVEYING SYSTEMS

COFFEE CONVEYING SYSTEMS

Self-Contained Coffee Whisper® Loaders

Coffee Whisper Loaders are Self-Contained vacuum conveying systems that let you transfer 'green' coffee beans from a bag, super sack or box to a roaster, then to a whole-bean packaging station, or to a grinder, then to a grounds packaging station.

- Standard vacuum source is a durable, long-life brush-type motor. Standard voltage 120VAC/10/60Hz (240VAC optional). Tangential discharge (exhaust-air silencer kit is optional).

- 100% seal-welded body in aluminum or stainless steel with smooth internal finish, boxed-tangential material inlet, material-level control for receiving / hopper. Mounting flange and 6" discharge spout.

- Spun aluminum cover assembly with motor-mount tabs and integral air-blast pipe with Vibra-Pulse automatic filter-cleaning system (requires 0.5 SCFM @60 PSI of dry, filtered compressed air per cycle, air source not included)

- Flat-Disc polyester felt filter with food-grade rubber gasket (seals cover to body). Optional filter media and types are available.

- Pneu-Vue PLC-based Control Panel, NEMA 1 Hinged Enclosure. NEMA 4 or 12 available.

- Variable Speed Control option is available.

- Adjustable Aluminum Pick-up Lance & 15-ft flexible hose.

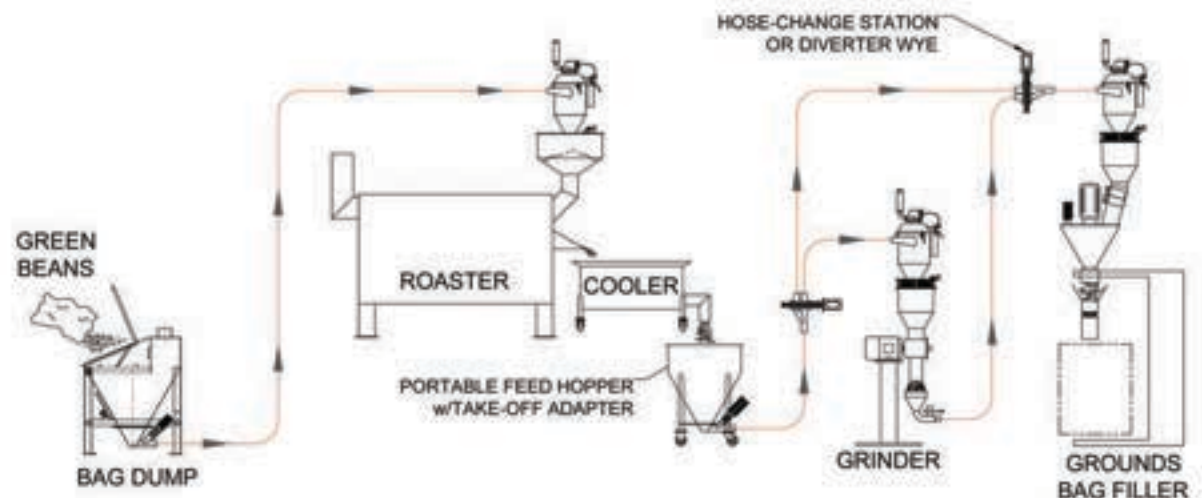

Coffee Conveying System Options

- Fully Assembled and ready to use.
- Green bean coffee loader packages are available.
- 304 stainless steel construction, special finishes available.
- Conveying adapters and flow control valves are available.
- Portable feed bin hoppers are available.

Coffee System Conveying Process Segments

Transfer 'green' coffee beans from a bag/super sack/box to a roaster, then to a whole bean packaging station, or from a roaster to a grinder, then to a grounds packaging station.

Pneu-Con custom-designs, engineers and manufactures quality Pneumatic Conveying Systems including Central Powered Systems, Self-Contained Systems, Powder Loaders & Receivers, Bag Dump Stations, Blower Packages, Bulk Bag Racks, Day Bins, Silos, Tilt Stations (Drum & Gaylord), Weigh Hopper/Batchers, Volumetric/Gravimetric Blenders, Vertical Mixers, Rotary Airlocks, Railcar Unload Systems, Just-In-Time Conveying, Fines Separators and System Controls.
